Preventing **DEMENTIA**

Free **Online** Course

Opens 15th May - Help us to spread the word!

Dear Joan,

I am writing to you as someone who has previously completed the Preventing Dementia MOOC to let you know that we are currently accepting enrolments (up until 25th May), for the next offering of the course, which opens in just under two weeks time, on the 15th May.

I would love your support in spreading the word about brain health.

Over 12,000 people have already enrolled in the May 2018 Preventing Dementia MOOC. This means we've now had over 38,000 people enrol in this course since its inception. This means 26,000 people, just like you, have had the opportunity to examine the latest evidence in dementia prevention and contribute to growing community knowledge in this vital area, with thousands more soon to follow.

This fantastic result has been made possible thanks to the help of our MOOC alumni and I wish to thank everyone for their positive feedback and support in helping us spread the word.

I am hoping you would be willing to help us again, even in a small way, so that together we can reach even more people to improve knowledge of brain health across the world.

Things you can do to help:

- If you know of someone else who might be interested, please encourage them to sign up at <https://mooc.utas.edu.au/landing/pd11share>
- Perhaps print this [poster](#) or [flyer](#) and display it in your workplace or on your local community noticeboard.
- Visit the Preventing Dementia Facebook Page <https://www.facebook.com/PreventingDementia> and share our post to 'enrol now' with your networks.

We encourage everyone to take advantage of this fantastic opportunity to participate. Even if you have undertaken the course in the past, this is a great opportunity to refresh your knowledge. Based on your course feedback, we have updated and added content, as well as condensed the course into an accessible new four-week format. [Click here](#) for more information or to enrol.

Thanks again for your ongoing support in taking dementia prevention knowledge to the world.

Kind regards,

James Vickers
